

Abstract

Every day we have a lot of used coffee grounds (raw material) from the bar and cooking stations. The student trainee has realized that used coffee grounds can be applied to another benefit. And it is thought that used coffee grind can be useful for the skin. Once processed into soap the used coffee grounds will make your skin radiant and soft.

Scrub the skin by using the used coffee grounds help reduce costs and it is a good way to recycle. The benefit can be seen available in real life. the resulting skin will look healthy, vascular will improve. Because used coffee grind is a mixture of caffeine, which helps to stimulate and refresh the body. As well as the skin of our people that used this method see that it helps their blood vessels expand to ensure a healthy skin.

Key words: Coffee grounds / Scrub the skin
